Who We Are

MoGhraOps, LLC is a Service-Disabled Veteran-Owned Small Business headquartered in San Antonio, Texas, with operations across the Northern Virginia corridor and remote depth. We are a guild of disciplined engineers — not a body shop — delivering software engineering, DevSecOps, cloud, infrastructure, security operations, DataOps, and CMMC compliance to federal and mission-driven organizations.

We are not a body shop. We are a guild of disciplined engineers who show up — consistently, reliably, and with steady craftsmanship — in week one and in month eighteen.

Our guiding philosophy — the Four Loves of Craft, People, Mission, and Progress — shapes every engagement. We believe **consistency yields prosperity**. That belief is not a tagline. It is how we work.

Core Capabilities

Software Engineering — custom applications, Java & Spring Boot, secure by design

DevSecOps & Cloud — CI/CD, container & Kubernetes security, infrastructure as code; AWS & Azure

Infrastructure & Hardening — golden-image pipelines, DISA STIG hardening, enterprise Linux

Security Operations — continuous monitoring, RMF / POA&M, ICAM, incident response

DataOps & Observability — data pipelines, ETL, telemetry, alerting, operational visibility

CMMC & Compliance — practitioner-led readiness, proven on our own infrastructure first

↳ **StandFast** — MoGhraOps's managed CMMC compliance platform for small DIB contractors. Postured · Monitored · Maintained.

The Bench — Founding Fellows

MoGhraOps operates as a guild of Founding Fellows — senior practitioners with federal, defense, and commercial credentials spanning software engineering (Java / Spring Boot), DevSecOps and cloud, infrastructure and Linux hardening, security operations, data engineering, and CISSP-credentialed security leadership. Fellows hold advanced degrees across cybersecurity, data engineering, software engineering, cloud architecture, and information systems.

Domains covered: Intelligence Community · DISA & DoD Enterprise · Department of Navy · Air Force · Cleared contractor environments · Commercial cloud

Clearance depth: Collective clearance depth reaches TS/SCI with CI Polygraph among key personnel — active and recently adjudicated.

Key personnel: Full narrative bios and credentials available in MGO-BD-0002 upon request.

Past Performance — Key Personnel

Documented past-performance narratives are available upon request (MGO-BD PP_001-PP_009). The following represents the collective experience of MoGhraOps key personnel prior to company formation.

Intelligence Community — Enterprise platform engineering and data infrastructure across IC programs, Northern Virginia corridor.

DISA & DoD Enterprise — DevSecOps pipeline implementation and secure cloud architecture for DoD enterprise systems, including Platform One.

Department of Navy / Air Force — Infrastructure modernization, BDP systems, and platform engineering across Navy and Air Force components.

CyberOps & ISSM — ISSO, ISSM, and ISSE roles in cleared contractor environments — security architecture, compliance alignment, continuous monitoring.

Software & Threat Data — Custom application development and threat-data platform integration with structured data handling across IC pipelines.

Commercial Cloud — AWS-first infrastructure design, multi-cloud operations, cost engineering, and DevOps transformation for commercial and hybrid environments.

Registrations & Set-Aside Eligibility

SDVOSB	Self-Certified · SBA VetCert in progress
CAGE Code	1A1F7
UEI	LP4SERDG9QH4
SAM.gov	Active
Primary NAICS	541512 — Computer Systems Design Services
Secondary NAICS	541511 · 541513 · 541519 · 541690
Home State	Texas (San Antonio)
Operations Region	Northern Virginia + remote
Clearance Depth	TS/SCI with CI Polygraph (key personnel)

The Four Loves of MoGhraOps

Love of Craft Disciplined engineering. Built to endure.	Love of People We honor the humans behind the mission.	Love of Mission Profound respect for what is at stake.	Love of Progress Patience and intention in every engagement.
--	---	---	---

Forged in Love. Built to Last.
